With the recent increase in motor vehicle-related fatalities in 2015, the highway safety community must strengthen its focus on driver behavior and address those human choices responsible for 94 percent of crashes. NHTSA Administrator Mark Rosekind will share how the agency is working to encourage the development, and inclusion, of new technologies that will impact driver behavior and driver expectations. New York Times bestselling journalist Matt Richtel will consider how technological innovations can impact the way we drive now and in the future.

**The Known Unknowns: Researching for Results**
Why should SHSOs care about research? Because research will identify your highway safety problems, find the most cost-effective strategies to use, and see if what you’ve been doing works or not. This session will give you a 30,000-foot view of behavioral safety research. It will describe how the familiar Countermeasures That Work summarizes the research behind the programs you use or are considering and will outline NHTSA’s planned improvements. It concludes with hot new research on why traffic fatalities changed so dramatically since 2010. With states permitted to use and pool NHTSA funds for research, this session couldn’t be more timely.

*Drug-Impaired Driving in the Age of Legalization*
Since the legalization of medical and recreational marijuana, the landscape around impaired driving has changed dramatically for policymakers and traffic safety professionals. What do we know? What is happening in states with legalization? What is the research and data telling us? How do states or jurisdictions prepare for legalization? Hear experts in their fields address research and data on impaired driving and what is happening nationally and at the state level. There are a variety of issues and challenges associated with legalization you need to be aware of. All states and our neighbors in Canada will be impacted. The most recent national data indicates that fatalities in crashes involving young drivers increased 10 percent from 2014 to 2015. This makes it even more critical to leverage our relationships to reach these at-risk road users. Peer-to-peer programs such as SADD and Family, Career and Community Leaders of America (FCCLA) present a great opportunity to do just that. **Working With Victim Advocates to Impact Change**

We will provide guidance to states and their partners on how to cultivate relationships with victim advocate groups to create real changes through legislation, policies and high level decision-making. Most of us understand how to involve victim advocates on the media side, getting attention for traffic safety campaigns, and understand the need for victim advocate training, but don’t necessarily know how to engage victim advocates to garner real, long-term changes. We will provide insight on how to do just that.
