DRUG- IMPAIRED DRIVING

A GUIDE FOR STATES

FOUNDATION FOR
ADVANCING ALCOHOL
RESPONSIBILITY

Today

- ▶ **Drug-impaired driving: very brief background**
- ▶ **What's new since 2015**
 - **Data**
 - **Laws**
 - **Research**
 - **Programs**
- ▶ **Questions**

What's in the Report

- ▶ **Definition:** what drugs can impair
- ▶ **Data:** problem size and characteristics
- ▶ **Science:** drug levels, impairment, and crash risk
- ▶ **Laws:** different types, what states have in place now
- ▶ **Enforcement:** SFST, DEC, oral fluid, blood testing
- ▶ **Prosecution and adjudication:** challenges and strategies
- ▶ **Training:** what's available and useful
- ▶ **Sanctions and treatment:** what's effective
- ▶ **Education:** what are states doing now
- ▶ **Recommendations for states**

Very Brief Background: Drugs

▶ Four drug types

- Illegal, legal non-medicinal, prescription meds, OTC

▶ Hundreds of drugs, more created daily

- FARS has codes for 430 specific drugs or metabolites

▶ FARS 2015, dead drivers, known test results

- 43% with drugs; more than 1/3 of these were marijuana
- 38% with alcohol (any BAC)

▶ NHTSA roadside survey 2013-14

- 22.5% with drugs, both weekday days and weekend nights
- 13% with marijuana on weekend nights
- 8% with alcohol on weekend nights; 1.5% with BAC .08 or above

Very Brief Background: Impairment

- ▶ **Any drug can impair – experimental studies**
 - Impairment can increase if drugs are used in combination or with alcohol
- ▶ **Drug presence ≠ impairment**
 - Some drugs dissipate rapidly while impairment remains; other drugs remain in the body long after impairment has dissipated
 - Wide ranges of drug concentrations in different individuals produce similar levels of impairment in experimental situations
- ▶ **Any drug can increase crash risk**
 - Good crash risk studies are difficult; lots of not-so-good studies
 - No equivalent of .08 BAC for any drug

Very Brief Background: Laws

▶ **Impairment laws (driving under the influence - DUID)**

- Illegal to drive while abilities impaired
- All states
- To enforce: observe behavior, link to evidence of a drug

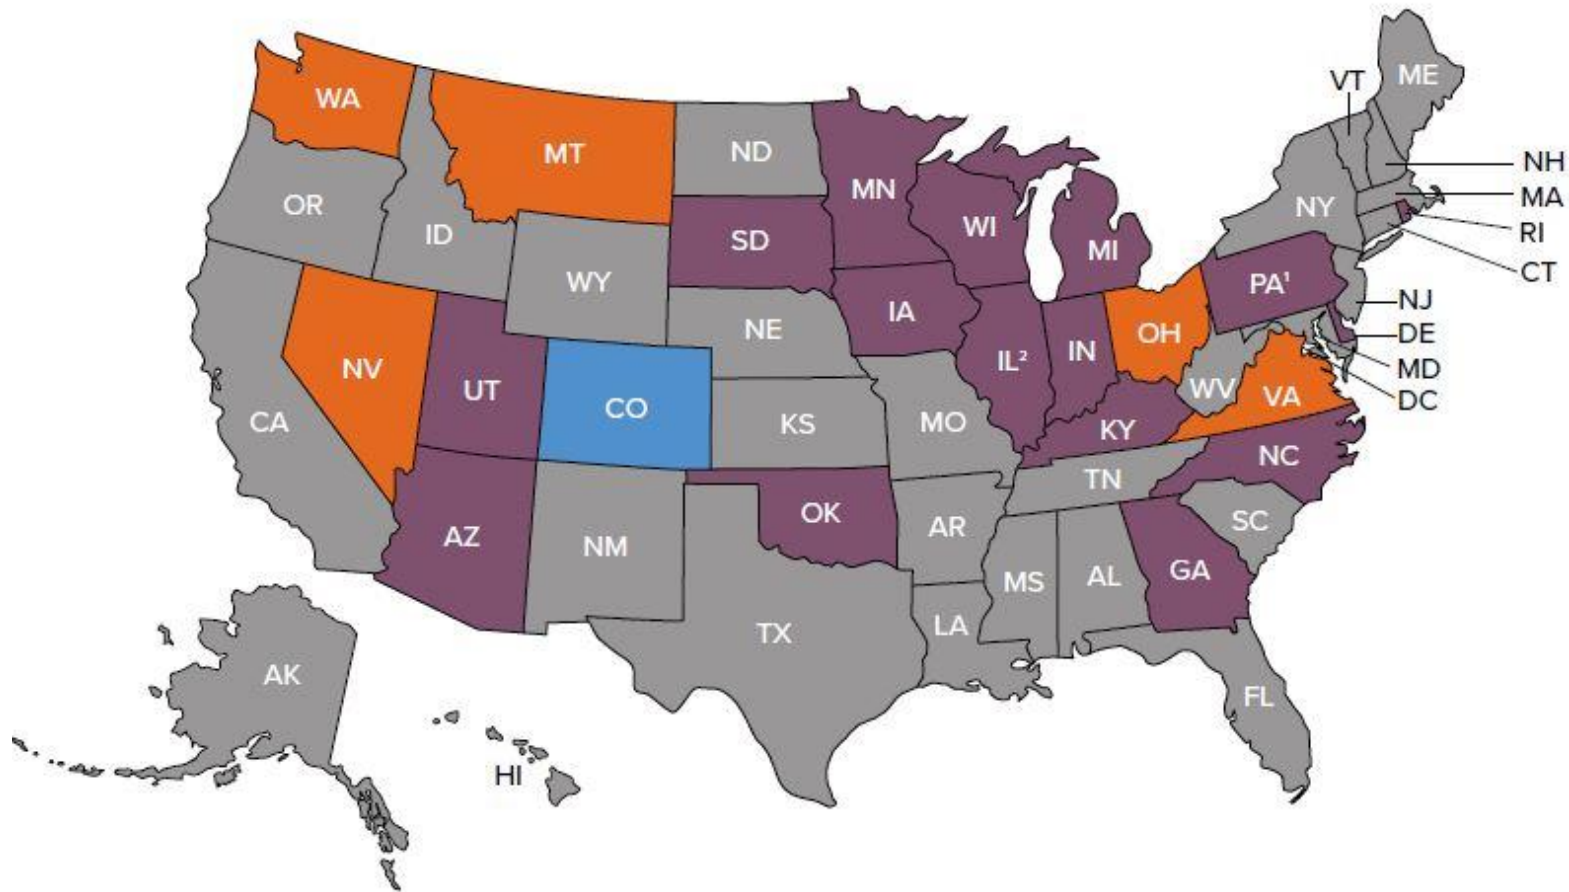

▶ ***Per se* laws**

- Illegal to drive with amounts over the *per se* limit
- 6 states, for some drugs
- To enforce: observe behavior, then chemical evidence of drug

▶ **Zero tolerance laws**

- Illegal to drive with any measureable amount (could include metabolites)
- 15 states, for some drugs
- To enforce: observe behavior, then chemical evidence of drug

STATE BY STATE:
DUID ZT or *Per se* for Some Drugs
AS OF APRIL 2017

1 Pennsylvania has both a zero tolerance law for some drugs and a 1 ng *per se* law for THC. Pennsylvania's 1 ng *per se* law is in effect a zero tolerance law*.

2 Illinois has both a zero tolerance law for some drugs and a 5 ng *per se* law for THC.

Click on a color to highlight the states in that category

- *Per se* limit greater than zero for some drugs
- Zero tolerance for some drugs
- Reasonable inference law with a limit greater than zero for THC

What's New: Data

- ▶ Drug use increasing; alcohol decreasing

Current marijuana users

- ▶ Almost one quarter of adults use marijuana

Beliefs about marijuana risks

70%
say marijuana's less
risky than alcohol

76%
say marijuana's less
risky than tobacco

67%
say marijuana's less
risky than opiates

What's New: Marijuana Laws

- ▶ **Recreational marijuana now allowed in 8 states and DC**
 - Voters approved in CA, MA, ME, and NV in 2016
 - Previously legal in AK, CO, OR, WA, and DC
- ▶ **Medical marijuana now allowed in 29 states and DC**
 - Up from 23 in 2015
 - West Virginia law signed April 19, 2017; use allowed July 1, 2019
- ▶ **Marijuana use decriminalized in 21 states and DC**
 - Up from 20 in 2015; these include recreational states
- ▶ **Canada considering legalizing marijuana use**

STATE BY STATE:
Marijuana Drug-Impaired Driving Laws
AS OF APRIL 2017

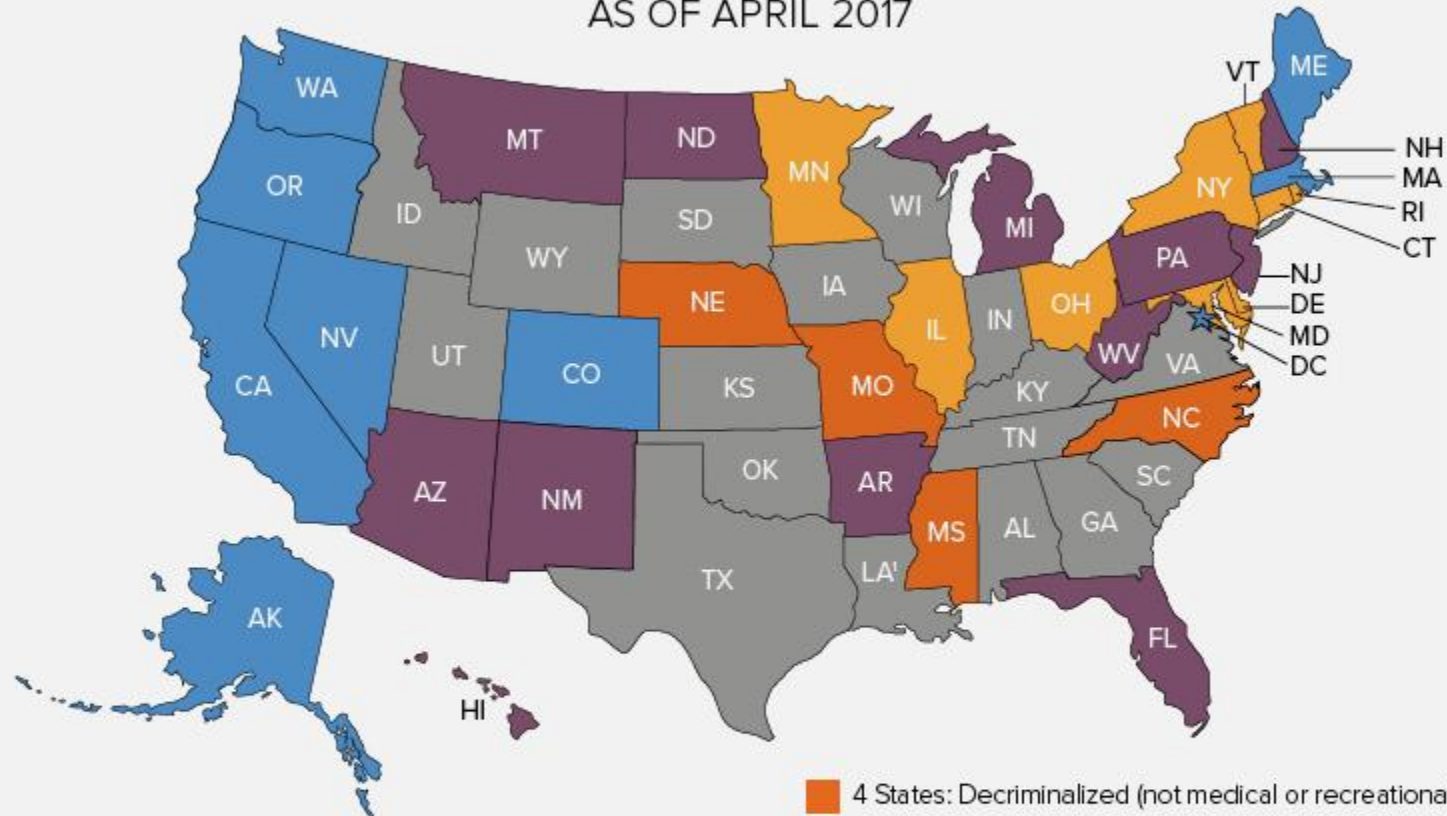

- 1 South Dakota is a zero tolerance state only for drivers under the age of 21.
- 2 Pennsylvania is often classified as both a zero tolerance and *per se* state. A minimum threshold of 1 ng is needed for a chemical test to be admitted into evidence for prosecution purposes.

Click on a color to highlight the states in that category

- Zero tolerance for THC and metabolites
- Zero tolerance for THC only
- THC *per se*
- Reasonable inference THC Law
- No zero tolerance or *per se* laws for marijuana

STATE BY STATE: Marijuana Possession and Use Laws

AS OF APRIL 2017

1 Louisiana has a medical marijuana law but implementation is limited;
NCSL does not consider Louisiana a medical marijuana state.

What's New: Research

33 new studies cited in 2017 update

- ▶ **Driver knowledge, beliefs, behavior – 3 studies**
- ▶ **Crash risk of drugs – 1**
 - NHTSA case-control study
- ▶ **Roadside drug test devices – 3**
 - Oral fluid – 2 new summaries of evaluations
 - Several devices available, about \$20 per test; results in 5 minutes
 - Field tests continuing; results promising
 - Marijuana breath test research – ongoing, will take several years

What's New: Research

▶ Laws – 3

- European DUID laws
- Scientific basis for *per se* laws

▶ Information and data – 4

- DUID prevalence and trends – US, Canada
- Sources of DUID information – NCSL for laws, NIDA for drug facts, TIRF *Drug-Impaired Driving Learning Centre*
- Data needs

▶ Drugs and belt use – 1

What's New: Research

▶ Marijuana-specific studies – 10

- Overall marijuana effects on society – NAS, Colorado
- Policy analyses
- Public knowledge and beliefs
 - “Safer to drive after using marijuana than after drinking alcohol”
- Crash risk increase
- Driver tolerance
- DRE detection of marijuana – quite good

▶ Effects of recreational marijuana in CO and WA – 7

- Trends in driver marijuana use, crashes
- Driver beliefs
- Overall impact of legalization

What's New: Programs

- ▶ Law enforcement : DEC and ARIDE
- ▶ State programs

Law Enforcement: DEC and ARIDE

▶ **DEC: Drug Evaluation and Classification**

- DRE officers can identify impairment by 7 drug categories
- 7,584 DREs active in all 50 states as of December 2014
- 1,444 new DREs added in 2014
- 26,471 evaluations conducted in 2014, in all 50 states
- Several states entering DRE evaluations directly onto tablet computers, making the data available immediately

▶ **ARIDE: Advanced Roadside Impaired Driving Enforcement**

- Trained officers can recognize drug impairment symptoms
- 10,419 officers trained in 2014; over 40,000 trained officers on the road

State Programs

- ▶ **Arkansas: Arkansas Take Back (unused medications)**
- ▶ **California: DUI prescription drugs, marijuana**
- ▶ **Colorado: Drive High, Get a DUI**
- ▶ **Maine: Driving and Drugs in Maine**
- ▶ **Minnesota: Deadly Decisions**
- ▶ **New York: Drugged Driving Is Impaired Driving**
- ▶ **Ohio: Drugged Driving = Done Driving**
- ▶ **Oklahoma: End DUI**
- ▶ **Oregon: Mariju What Was I Thinking?**
- ▶ **Washington: Drive High, Get a DUI BBQ**
