WHAT IS MARIJUANA?

Schedule I

Schedule I drugs, substances, or chemicals are defined as drugs with no currently accepted medical use and a high potential for abuse. Some examples of Schedule I drugs are:

heroin, lysergic acid diethylamide (LSD), marijuana (cannabis), 3,4-methylenedioxymethamphetamine (ecstasy), methaqualone, and peyote

An aerial photograph of the Colorado State Capitol building, featuring a prominent golden dome. The scene is set during sunset or sunrise, with a sky filled with dramatic, colorful clouds in shades of orange, pink, and purple. The city of Denver is visible in the background, with various urban buildings and streets. A large green circle is superimposed on the upper part of the image, containing the number 4.
